Shape-reduction audit: new defect and control cases

Auto arm only. No reduction-off or v1 baseline campaign.

New audit case	Discovery	Final: seed 11	Final: seed 23	Final: seed 37
optimizer step 1	MISSED	detected	detected	detected
optimizer step 2	MISSED	detected	detected	detected

context first call nan	unit miss*	detected	detected	detected
optimizer training mode	unit miss*	detected	detected	detected

Discovery: 19 revision-3 full checks, seed 11. *Two additional misses reproduced in worker tests during the fix.
Final: 21 cases × 3 seeds shown; the complete replay also includes 39 existing cases × 3 seeds.
Detected means the expected confirmed diagnostic was emitted. Fallback remains part of the auto arm.
